Product highlights.

Outstanding craftsmanship.
The blades are made of exceptionally fine industrial-grade chrome alloy steel, through-hardened and anchored in the grip in such a way that they stay there.

Robust.
Whether slotted or cross-head - the rough blade tips transfer even the greatest torques to the screws - precisely and safely.

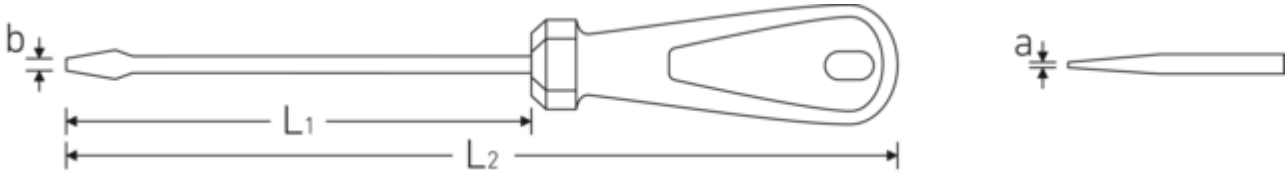

Versatile.
The lever hole allows even more power and torque if necessary.

Technologies and features.

3K DRALL®
The STAHLWILLE 3K DRALL® handle with non-slip, special fibre-coated surface enables fatigue-free working and maximum power transmission. An ingenious opening serves both as a hanging hole and as a lever hole for additional force and high torque.
